

ZeroSixtyThree — Image Checklist

Verified against the code on **2026-08-25**. Organised by **FILE**, not by section — because several files are used in more than one place. There are **22 files** to supply, not 27 slots. Save each Canva export using the exact **SAVE AS** name below.

How to send them: export as **JPG** (or PNG), name the file exactly as shown, and put them all in one folder. Do not convert to .webp — I do that automatically when I install them. If a file is missing I simply leave the current one in place, so you can send them in batches.

Why this matters: almost every photo on the site today was recovered by cropping 1366 px-wide screenshots of your old website. Most are between 190×142 and 226×348 pixels, displayed 3–8× larger than their real size. That is the entire reason they look soft. **BLOCKER B2.**

- P1 — blocking / looks broken now
- P2 — real photo but far too small
- P3 — optional upgrade
- OK — done

A — HERO & LANDING							
✓	SAVE AS	RATIO	EXPORT SIZE	WHAT THE PICTURE SHOULD SHOW	APPEARS IN	NOW	PRI
☐	hero-bg.jpg	16:9	2560×1440	Wide landscape of a live setup — truss, lighting rig, stage, flight cases. Must have empty or dark space on the LEFT half — the ZERO SIXTY THREE wordmark sits there. Busy detail on the right is good. Moody / low light is ideal; it is converted to black & white automatically.	Home hero background full screen	1600×900 upscaled	P2
☐	hero-main.jpg	4:5	1200×1500	A person <i>working</i> — camera operator filming, engineer at the desk. Vertical. Your strongest single shot — this is the framed photo beside the wordmark.	Home hero — large frame NEW dedicated file — see note ★	226×348 shared w/ About	P1
☐	hero-detail.jpg	5:4	1000×800	A tight detail that contrasts the main frame — drum kit, mixer faders, cabling, a lit stage. Small on screen, so it must read instantly.	Home hero — small frame NEW dedicated file — see note ★	512×408 shared w/ Bento	P2
☐	stage-truss.jpg	21:9	2560×1080	Wide, dramatic establishing shot — full stage and truss before doors, or a packed venue. Very wide crop, so the subject must survive heavy letterboxing.	Home — services closing band Portfolio gallery	1240×308	P2

B — THE TWO HOUSES (THE SIGNATURE SECTION)

✓	SAVE AS	RATIO	EXPORT SIZE	WHAT THE PICTURE SHOULD SHOW	APPEARS IN	NOW	PRI
☐	sound-engineer.jpg	4:3	1600×1200	The rugged 063 Productions mood — loud, energetic: crowd, stage lights, live performance, engineer at front of house. Sits behind text at 30–45% opacity, so keep the centre relatively calm.	Home — Two Houses LEFT Services bento (sound) Portfolio gallery	664×444	P2
☐	society-main.jpg	4:5	1200×1500	The elegant 063 Society mood — refined banquet, tasteful lighting, table settings, an upscale private event. Calm and premium: the <u>opposite</u> of the Productions photo. Do not reuse concert or stage shots here.	Home — Two Houses RIGHT Society page hero same file in both — see note ▲	PLACEHOLDER grey frame	P1

C — ABOUT PAGE (5 VERTICAL TILES)

These five also supply the layered collage on the Home page — no extra files needed for it. They sit at staggered heights as a set, so give them a common look.

✓	SAVE AS	RATIO	EXPORT SIZE	WHAT THE PICTURE SHOULD SHOW	APPEARS IN	NOW	PRI
☐	tile-guitar.jpg	2:3	1000×1500	A performer or musician mid-performance — guitar, singer, instrument in hand. Vertical.	About tile 1	226×348	P1
☐	tile-mixer.jpg	2:3	1000×1500	Hands working a mixing console — close, tactile, faders and knobs visible.	About tile 2 Home collage	226×348	P1
☐	tile-stage.jpg	2:3	1000×1500	An empty stage rigged with lighting truss — before the crowd arrives.	About tile 3 Home collage	228×344	P1
☐	tile-camera-op.jpg	2:3	1000×1500	A camera operator filming an event — person behind the rig, working.	About tile 4 Home collage	226×348	P1
☐	tile-camera.jpg	2:3	1000×1500	Equipment still life — camera body, lenses, printed photographs.	About tile 5	226×348	P1
☐	video-camera.jpg	3:4	1200×1600	One strong portrait shot of the team at work — cinema camera rig on a shoot, or an engineer mid-setup. Held large next to the story text.	About — story frame Services bento Portfolio gallery	664×448	P2

D — EVENT CATEGORIES (6 HOVER PREVIEWS)

Each must instantly read as its category — these appear when someone hovers the event list.

✓	SAVE AS	RATIO	EXPORT SIZE	WHAT THE PICTURE SHOULD SHOW	NOW	PRI
☐	ev-corporate.jpg	4:3	600×450	Corporate Events & Seminars — speaker presenting, conference room, branded stage.	190×156	P1
☐	ev-concert.jpg	4:3	600×450	Concerts & Festivals — crowd and stage lighting, energy, big audience.	200×156	P1
☐	ev-wedding.jpg	4:3	600×450	Weddings — reception setting, table styling, first dance, elegant lighting.	190×140	P1
☐	ev-sports.jpg	4:3	600×450	Sports Events — supporters cheering, arena, announcer or scoreboard.	202×140	P1
☐	ev-community.jpg	4:3	600×450	Community & Charity — people taking part, families, an outdoor community gathering.	190×142	P1
☐	ev-themed.jpg	4:3	600×450	Themed Events & Productions — styled set, themed staging, outdoor production rig.	200×142	P1

E — SERVICES BENTO GRID

✓	SAVE AS	RATIO	EXPORT SIZE	WHAT THE PICTURE SHOULD SHOW	APPEARS IN	NOW	PRI
☐	audio-desk-top.jpg	4:3	1600×1200	Audio equipment hero shot — mixing desk, speaker stacks, amp racks. This is the largest tile. Sits behind text at ~25% opacity, so keep the middle calm.	Services — feature tile Portfolio gallery	1366×262 wrong shape	P2
☐	dj-decks.jpg	4:3	1200×900	DJ decks or controller with hands on them, ideally crowd or lighting behind.	Services — DJ tile Portfolio gallery	964×192 wrong shape	P2
☐	photo-lens.jpg	4:3	1200×900	Photography kit — lens, camera body, a considered still life.	Services — photography Portfolio gallery	1064×318 wrong shape	P2
☐	bento-sports.jpg	4:3	1200×900	OPTIONAL — this tile is deliberately text-only. Two tiles are left without photos so the grid can breathe. Send only if you want every tile to carry an image. Would be: announcer with a mic at a sports event.	Services — sports announcing	none by design	P3
☐	bento-emcee.jpg	4:3	1200×900	OPTIONAL , same as above. Would be: emcee hosting on stage with an audience.	Services — hosting & emcee	none by design	P3

F — 063 SOCIETY — no photography has ever been supplied (B4)

✓	SAVE AS	RATIO	EXPORT SIZE	WHAT THE PICTURE SHOULD SHOW	NOW	PRI
☐	society-wide.jpg	3:2	1800×1200	A wider elegant scene — the room in full, styling and lighting visible. Calm, spacious, premium.	PLACEHOLDER	P1
☐	society-tall.jpg	4:5	1200×1500	A detail that rewards a close look — glassware, florals, a place setting, a considered corner of the room.	PLACEHOLDER	P1

([society-main.jpg](#) is listed in section B — it serves both the Society hero and the Two Houses panel.)

G — PORTFOLIO, PARTNERS & SHARING

✓	SAVE AS	RATIO	EXPORT SIZE	WHAT THE PICTURE SHOULD SHOW	NOW	PRI
☐	portfolio-01.jpg portfolio-02.jpg ...and so on	4:3	1600×1200 each	Your actual best work — real events you delivered. Right now the portfolio borrows the same photos used elsewhere on the site, which is why it does not yet feel like a portfolio. This is the page that wins you jobs. Send as many as you have — number them in order.	reused photos	P1
☐	partner-01-logo.png one per partner	2:1	SVG preferred or 800×400	One logo per partner on a transparent background. BLOCKER B8 — we also need written permission per partner before their mark can be shown, plus which projects belong to whom.	page empty	P2
☐	social-share.jpg	1.91:1	1200×630	OPTIONAL. The image shown when someone shares the site on Facebook / WhatsApp / LinkedIn. Currently auto-generated from the logo — functional but plain. A real photo would look far better.	generated	P3

★ **Two new files for the hero.** Right now the hero's large frame is the *same photo* as an About tile, and its small frame is the same as a Services tile. Sending dedicated [hero-main.jpg](#) and [hero-detail.jpg](#) gives the hero its own identity. If you would rather not, skip them and I will keep reusing the About/Services shots — nothing breaks.

▲ **One Society photo currently covers two places** — the Two Houses panel on the Home page and the Society page hero. If you want them to be different pictures, send a second file named [society-hero.jpg](#) (4:5, 1200×1500) and I will split them.

Two rules when exporting from Canva

- 1. Use the export size shown, or larger — never smaller.** These are already 2× so images stay sharp on phones and retina screens. Smaller will look soft, which is exactly the problem the current photos have.
- 2. Match the ratio.** The layout crops to the ratio shown, from the centre. Send a square image for a 21:9 slot and the top and bottom of your subject get cut off. Colour grading does not matter much — several slots are converted to black & white automatically to match the brand.

NEEDS NO IMAGES AT ALL

Verified in code — typography-only by design, nothing required: **Service ticker** · **Manifesto** · **Services preview** · **Mid-page CTA band** · **Testimonials teaser** · **Final CTA** · **About hero** · **Services hero** · **Society statement** · **Society categories** · **Society CTA** · **Contact details** · **Booking form**.

Logo files, favicon and app icons are already supplied and in use — no action needed.
